Store your **In Case Of Emergency** information
with your local Council and

Help Them to Help You

When you are in an emergency, the information that our emergency services have about you, your family or co-workers can make the difference to saving life and property.

This information is known as **In Case of Emergency** information (I.C.E.) and includes people's names and contact details. The earlier that emergency services have this information the better they can plan their response.

Spatial View is an initiative by Council to provide a safe and secure place for people in our municipality to record and store their ICE information. This information is then made available to emergency information as soon as they are alerted to incident.

*Your I.C.E. information is available to emergency services **BEFORE** they get to you*

Who Can Use Spatial View

Spatial View can be used by everyone. From domestic residences, businesses and community services such as aged care and child care., anyone can use Spatial View.

Spatial View is completely voluntary and you control the information that you supply.

How is my Information used?

Spatial View information is only used when your residence or premises has been identified as being directly involved in an incident.

Access to your information is strictly controlled by Council and only authorised emergency services personnel can use the information.
